Professional Summary

Computer Science student at Transport and Telecommunication Institute (TSI) with practical experience in Python, C++, Linux, and software development projects. Experienced in building backend tools, automation solutions, and self-hosted applications. Interested in gaining professional software engineering experience while continuing to develop programming, testing, and problem-solving skills.

Technical Skills

Languages:

Python, C++, Bash

Tools & Technologies:

Docker, Docker Compose, Git, Linux CLI, SSH

Concepts:

REST APIs, Automation, Version Control, Containerization

Infrastructure & Systems:

Linux (Ubuntu), reverse proxy configuration, basic networking (ports, DNS, routing)

Projects

YouTube Playlist Downloader

GitHub: github.com/darkzoul5/YoutubePlaylistSync

- Developed a Python application to synchronize and organize YouTube playlist content locally
- Implemented batch processing, file management, and automated update workflows
- Integrated external tools and APIs for media retrieval and processing
- Managed development using Git and GitHub.

VPN Subscription Aggregation Tool

GitHub: github.com/darkzoul5/3x-ui_sub_aggregator

- A tool to aggregate and transform multiple subscription sources into a unified subscription
- Automated retrieval and processing of remote data for client configuration use
- Implemented data parsing, transformation, and aggregation of remote subscription sources

Personal Website (Self-Hosted Deployment)

GitHub: github.com/darkzoul5/Personal-Webiste

- Developed and deployed a simple personal website hosted on a self-managed Linux server
- Integrated into containerized infrastructure with automated deployment workflow
- Demonstrates practical web hosting, deployment, and system integration skills

Self-Hosted Infrastructure (Home Lab)

- Designed and maintain a self-hosted environment consisting of approximately 80 Docker containers across 3 Linux hosts.
- Deployed and managed services including Traefik, Authentik, Gitea, Matrix Synapse, Home Assistant, and AdGuard Home.
- Configured reverse proxying, TLS certificates, DNS, VPN access (VLESS), and CI/CD workflows.
- Troubleshoot networking, authentication, deployment, and service availability issues.

Education

Transport and Telecommunication Institute (TSI), Riga

Bachelor of Computer Science (Expected 2028)

Relevant coursework:

- Data Structures
- Operating Systems
- Programming Fundamentals
- Object Oriented Programming

Certifications:

Cisco Networking Academy - Introduction to Cybersecurity (2024)

[Credly](#)

Cisco Networking Academy – Learn-A-Thon 2024

[Credly](#)

Red Hat - OpenShift Development I: Introduction to Containers with Podman (2026)

[Credly](#)

Red Hat - System Administration I (2026)

[Credly](#)

Work Experience

General Laborer — Airport Equipment Manufacturer, Riga

Summer 2022

- Supported mechanical teams in manufacturing airport infrastructure equipment
- Performed cutting, drilling, grinding, and assembly tasks
- Worked in a fast-paced, environment requiring precision, teamwork, and reliability

Languages

- English — B2 (fluent working proficiency)
- Russian — Native
- Latvian — B2
